MUHIRE BAGINA CHRISTIAN

ASPIRING COMPUTER SCIENTIST | SOFTWARE DEVELOPER | AI ENTHUSIAST

Kigali, Rwanda | +250 790 865 408 | christianbagina@gmail.com | Portfolio: muhire-dev-space.lovable.app | GitHub: github.com/muhirechristian | LinkedIn: /muhire christian

PROFESSIONAL SUMMARY

Motivated Rwandan software developer and aspiring Computer Science and Artificial Intelligence student with a strong interest in building technology-driven solutions to real-world challenges. Experienced in developing web applications, working with modern JavaScript technologies, relational databases, and AI-assisted development tools. Demonstrates initiative through independent software projects, technology education, and participation in emerging technology programs. Particularly interested in artificial intelligence, software engineering, cybersecurity, and digital transformation. Aspires to pursue undergraduate studies internationally, develop advanced technical and research capabilities, and contribute to Rwanda's growing digital economy through innovative technology solutions.

TECHNICAL EXPERTISE

Programming: JavaScript, Python, Dart, HTML5, CSS3

Frontend: React.js, React Native, Tailwind CSS, Bootstrap, TypeScript

Backend: Node.js, Express.js, REST API development

Databases: MySQL, SQL, MongoDB, Supabase

Mobile Development: Flutter, React Native

AI & Emerging Technologies: Artificial Intelligence fundamentals, Machine Learning fundamentals, Blockchain fundamentals

Tools: Git, GitHub, Postman, Figma, Visual Studio Code

SELECTED TECHNICAL PROJECTS

SchoolOS – School Management Platform | Independent Developer, Rwanda

- Developing a digital school management platform designed to support educational institutions in Rwanda.
- Designing a multi-school management architecture and developing interfaces with React, TypeScript, and Tailwind CSS.
- Exploring database integration, secure authentication, and role-based access for administrators, teachers, parents, and students.
- Developing concepts for student records, attendance, academic performance, and school fee management.

Dream – Web Development Project | Independent Developer

- Built and deployed a modern web application.
- Applied responsive web development and interface design principles.
- Used AI-assisted development workflows to support implementation and practiced independent problem-solving.
- Live project: dream-webiste.vercel.app

Independent Software Development | Personal Technical Development

- Developed practical skills through independent coding and project implementation.
- Explored full-stack application development using the MERN ecosystem.
- Practiced API integration, database operations, and responsive interface development.
- Explored mobile application development using Flutter and React Native.

LEADERSHIP & PROFESSIONAL EXPERIENCE

EjoLabs Summer Talent Program | Selected Participant | 2026

- Selected for a technology development program focused on Artificial Intelligence and emerging technologies.
- Engaged in practical technology learning and innovation-oriented activities.
- Participating in collaborative learning and hackathon-related development.

CA TechWorks | Technology Trainer / Instructor

- Supported technology education for children and introduced learners to programming and technology concepts.
- Encouraged practical learning and problem-solving.
- Developed communication, mentoring, and instructional skills.

Technical Training – React, Express & MySQL | Training Facilitator

- Delivered practical instruction in modern web development technologies.
- Introduced learners to frontend and backend development concepts.
- Supported hands-on learning involving React, Express.js, and MySQL.

EDUCATION

Lycee Saint Alexandre Sauli De Muhura | Rwanda

- Secondary Education – Software Development
- September 2022 – July 2025 | Technical and Vocational Education and Training (TVET)
- Qualification: High School Diploma | National examination result: 70%

CERTIFICATIONS & ADDITIONAL LEARNING

Professional Development

- Cisco Technology Training Certificate.
- Elements of AI – Introduction to Artificial Intelligence.
- Blockchain-related training.
- Independent professional development in full-stack software engineering and emerging technologies.

LANGUAGES

Language Proficiency: Kinyarwanda – Native | English – Working proficiency | French – Basic proficiency

ACADEMIC & CAREER INTERESTS

Areas of Interest: Computer Science; Artificial Intelligence and Machine Learning; Software Engineering; Cybersecurity; Data Science and Big Data; Digital Innovation and Technology for Sustainable Development

PERSONAL MOTIVATION

Statement

My ambition is to become a technology innovator capable of developing solutions that address meaningful challenges in society. Growing up in Rwanda has strengthened my interest in the role of technology in education, economic development, and social transformation. I believe studying Computer Science and Artificial Intelligence in an international academic environment will allow me to expand my knowledge, gain research experience, collaborate with people from different backgrounds, and contribute to Rwanda's technological future.
